(54) ELECTRONIC MAIL SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To store the attached data of an electronic mail with the attached data in a web server and to refer to them.

SOLUTION: This system is constituted of a transmission side electronic mail 1 provided with a mail text 11 and the attached data 12, a mail server 2, the web server 3 and a reception side electronic mail 4 provided with the mail text 41 and data 42 for reference. Also, the mail server 2 is constituted of a separation part 21 for separating the received electronic mail 1 into the mail text 22 and the attached data 25 and preparing the data 23 for the reference and a transmission part 24 for merging the mail text 22 and the data 23 for the reference and transmitting them to a reception side. Also, the web server 3 is provided with a reference entry 31 and an attached data storage area 32 for storing the attached data 25.
